

Guidelines for Using IPM in Multifamily Housing Training Materials

Mission of the Northeastern IPM Center

The Northeastern Integrated Pest Management Center fosters the development and adoption of IPM, a science-based approach to managing pests in ways that generate economic, environmental, and human health benefits. The Center works in partnership with stakeholders from agricultural, urban, and rural settings to identify and address regional priorities for research, education, and outreach.

We are honored that you have selected the IPM in Multifamily Housing Training materials to increase IPM adoption. These guidelines are designed to help the Northeastern IPM Center keep track of how materials developed are being used. They were developed with input from numerous IPM and communication specialists throughout the Northeast.

Acknowledgments

- Include the Northeastern IPM Center logo (which can be accessed from www.northeastipm.org/about-us/publications/publication-guidelines-and-logos/) and the website www.NortheastIPM.org on printed materials that are reproduced.
- Give credit to those who have worked to develop the training using these words: “The *IPM in Multifamily Housing* training program which was adapted for this training was developed by a partnership including National Center for Healthy Housing, National Center for Environmental Health Strategies, National Pest Management Association, Northeastern IPM Center, Pennsylvania IPM Program, U.S. Centers for Disease Control and Prevention (CDC), U.S. Department of Housing and Urban Development (HUD), U.S. Department of Agriculture (USDA), and U.S. Environmental Protection Agency (EPA) with funding provided by HUD, USDA, EPA and CDC.”

Product Recommendations

We discourage authors from recommending specific pesticides, pesticide rates, etc., in these publications. If you feel it is appropriate to include such information, verify that all pesticide recommendations are in accordance with the *Guidelines* or *Recommendations* of the states for which the document is intended. If you need assistance, check with the pesticide office of the appropriate state(s). Your publication should indicate the date on which this information was verified.

- Pesticide disclaimer. You should use a disclaimer if you recommend *any* product

- for pest control. Unless your institution mandates a particular disclaimer, please use this version: “The recommendations in this publication are not a substitute for pesticide labeling. The label is the law; read it and follow the instructions before applying any pesticide.”
- Product disclaimer, if you name a product: “No product discrimination is intended by the authors and their institutions. No endorsement of any products mentioned or criticism of unnamed products is implied.”

Distribution

- If your project is a printed publication or CD, please mail two copies to Carrie Koplinka-Loehr, Co-director, Northeastern IPM Center, The Insectary, Cornell University, Ithaca, NY 14853.
- If your project is a website, email the URL to Carrie Koplinka-Loehr (ckk3@cornell.edu) and link to the Northeastern IPM Center (www.NortheastIPM.org).

Impact and Evaluation

- If you receive feedback on the training materials that we could use to improve them, please send recommendations to stoppests@cornell.edu.
- If you document impact from the use of the materials, please send data to stoppests@cornell.edu. Suggested data include:
 - Number of people trained;
 - Jobs of people trained;
 - Material distribution;
 - Learning results;
 - Changes in pest pressure after IPM training.
