Defining Hoarding for Housing Providers

- Is there the acquisition of and failure to discard a large volume of possessions
- Does the clutter make it difficult to use rooms for their intended purpose?
- Is there distress or impairment in functioning caused by the clutter?

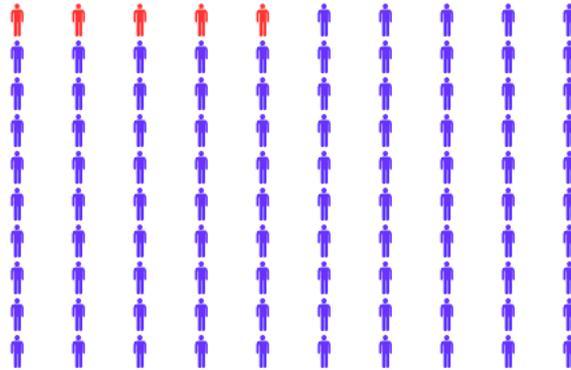

Squalor vs. Hoarding

- Hoarding and squalor are not the same
- Squalor is defined as filthiness or degradation from neglect
- Hoarding is typically characterized as a cluttered living environment; clutter may exist with or without poor sanitation

Demographics

- Saving begins in childhood/adolescence
- Average age in treatment = 50
- Marital Status: tend to be single
- Education: ranges widely
- Family history of hoarding is common
- Squalid conditions uncommon among treatment seekers

Prevalence in the United States

3-5%, approximately
15 million people in
the U.S. population
has hoarding

In Comparison:

5.4 million Americans have Alzheimer's Disease

1.2 million Americans live with HIV

Approximately 735,000 Americans have a heart attack each year

Housing Studies:

~7% Single Room Accommodation in Vancouver (Woody et al., 2013; under review)

Hoarding and Public Health

- Fire hazards
 - Increased volume of flammable materials
 - Blocked egress
- Tripping hazards
- Structural problems
- Eviction
- Community cost
- Pest infestation

Hoarding and Public Health

- According to the US Centers for Disease Control and Prevention (CDC), integrated pest management (IPM) is necessary to reduce the number of pests that threaten health and property, while reducing human exposures to harmful pesticides

Public Housing

- Hoarding, poor sanitation and/or clutter are potential barriers to the successful implementation of Integrated Pest Management (IPM)
 - Identified as challenge in IPM pest control
- Urban public housing as high-density living situations
- Annual Inspections
- Tenancy preservation
- Diversity

Objectives

Phase I:

- Characterize the prevalence of hoarding behavior in BHA housing
- Assess the associations between clutter and/or poor sanitation, and pest control visits

Phase I:

- Pilot an intervention with residents to reduce hoarding behavior
- Develop and deliver a hoarding intervention training to key BHA staff

Objectives

Phase I:

- Characterize the prevalence of hoarding behavior in BHA housing
- Assess the associations between clutter and/or poor sanitation, and pest control visits

Phase II:

- Pilot an intervention with residents to reduce hoarding behavior
- Develop and deliver a hoarding intervention training to key BHA staff

Phase 1: Methods

- Four public housing developments: (approx. 1600 units)
 - 2 elderly/disabled
 - 2 family
- Develop a database
 - Living unit inspection and pest forms from April 2011-March 2013
- Preliminary data analysis

Living Unit Inspection Forms

BHA Annual Apartment Inspection Form for UPCS/Mass. State Sanitary Code Compliance

| Date | Dev. # | LUI | Vacant | Legal | Apt. # | Address | BR Size | Resident Name | | | | | | | |

Living Unit Inspection Forms

- 3260 LUIs
- Health and Safety
 - Fire Exits Blocked
 - Flammable Materials
 - Tripping Hazards, sharp edges
 - Unsanitary Conditions/ debris
- No box for clutter
- Coded Comment box

Pest Control Forms

- 5516 pest forms
- Coding
 - Pest type
 - Bedbugs, mice, and cockroaches and other (ants and also non-specified, unknown pest types)
 - Pest mention (scheduled visits)
 - Pest activity (evidence of pest activity)
 - Clutter
 - Prepared for treatment (e.g. cabinets emptied)
 - Treatment
 - Refused entry and reasons

Clutter

- Excessive clutter could be an indicator of hoarding behavior
- Any clutter could affect pest control

| Variable Name | Criteria |
|-------------------|--|
| No Clutter | No mentions of clutter |
| Some Clutter | 1 mention of clutter with no strong qualifier (e.g. very, excessive) |
| Excessive Clutter | 2+ mentions of clutter or 1 mention with strong qualifier |

Poor Sanitation

- Any poor sanitation could affect pest control

| Variable Name | Criteria |
|----------------------|---|
| No Sanitation | No mentions of sanitation |
| Some Sanitation | 1 mention of sanitation with no strong qualifier (e.g. very, excessive) |
| Excessive Sanitation | 2+ mentions of sanitation or 1 mention with strong qualifier |

Objectives

Phase I:

- Characterize the prevalence of hoarding behavior in BHA housing
- Assess the associations between clutter and/or poor sanitation, and pest control visits

Phase II:

- Pilot an intervention with residents to reduce hoarding behavior
- Develop and deliver a hoarding intervention training to key BHA staff

Method

- Managers flagged units independently
- Prioritized units that were flagged by the data and the managers
- Coded and explored units that were flagged by data or managers (e.g., new resident)

© Copyright 2012—Awareness Concepts, Inc.—All rights reserved.

Pilot Sample (N=6)

- 4 Women and 2 Men
- 3 White/ Caucasian
- Mean age = 63.3 (7.8) (range 57-76)
- 4 were Single, Never married, not cohabitating
- 5 were not currently employed
- 3 attended some college, no degree
- 3 had incomes < \$5000 annual;
 - 6 Income <\$24,999

Case management Intervention

- Assessment
- Goal setting
- Motivation enhancement
- Harm reduction and safety planning
- Organizing
- Problem-solving
- Sorting and decision-making
- Additional resources and referrals

Clutter Image Rating Scale

Clutter Image Rating: Bedroom

Please select the photo that most accurately reflects the amount of clutter in your room.

1

2

3

4

5

6

7

8

9

Hoarding Rating Scale

- 5 item practitioner-administered or self-rated scale
 - Scales range from 0=no problem to 8=extreme (per item)
 - Item score of 4 or higher indicate clinical problem
1. Because of the **clutter or number of possessions**, how **difficult** is it for you **to use** the rooms in your home?
 2. To what extent do you have **difficulty discarding** (or recycling, selling, giving away) ordinary things that other people would get rid of?
 3. To what extent do you currently have a problem with **collecting free things** or **buying more things than you** need or can use or can afford?
 4. To what extent do you experience **emotional distress** due to clutter, difficulty discarding or problems with buying or acquiring things?
 5. To what extent do you experience **impairment** in your life (daily routine, job/school, social activities, family activities, financial difficulties) because of clutter, difficulty discarding, or problems with buying or acquiring things?

Tolin, Frost, & Steketee (2010)

Recommendations

- Standardize pest inspection forms
 - Include indicators of possible hoarding behavior
- LUI forms more amenable to tracking hoarding behavior
 - Add Clutter Image Rating to LUI forms
- Train BHA staff to assess, identify, and address hoarding
- Further examine the effectiveness of this case management model

Objectives

Phase I:

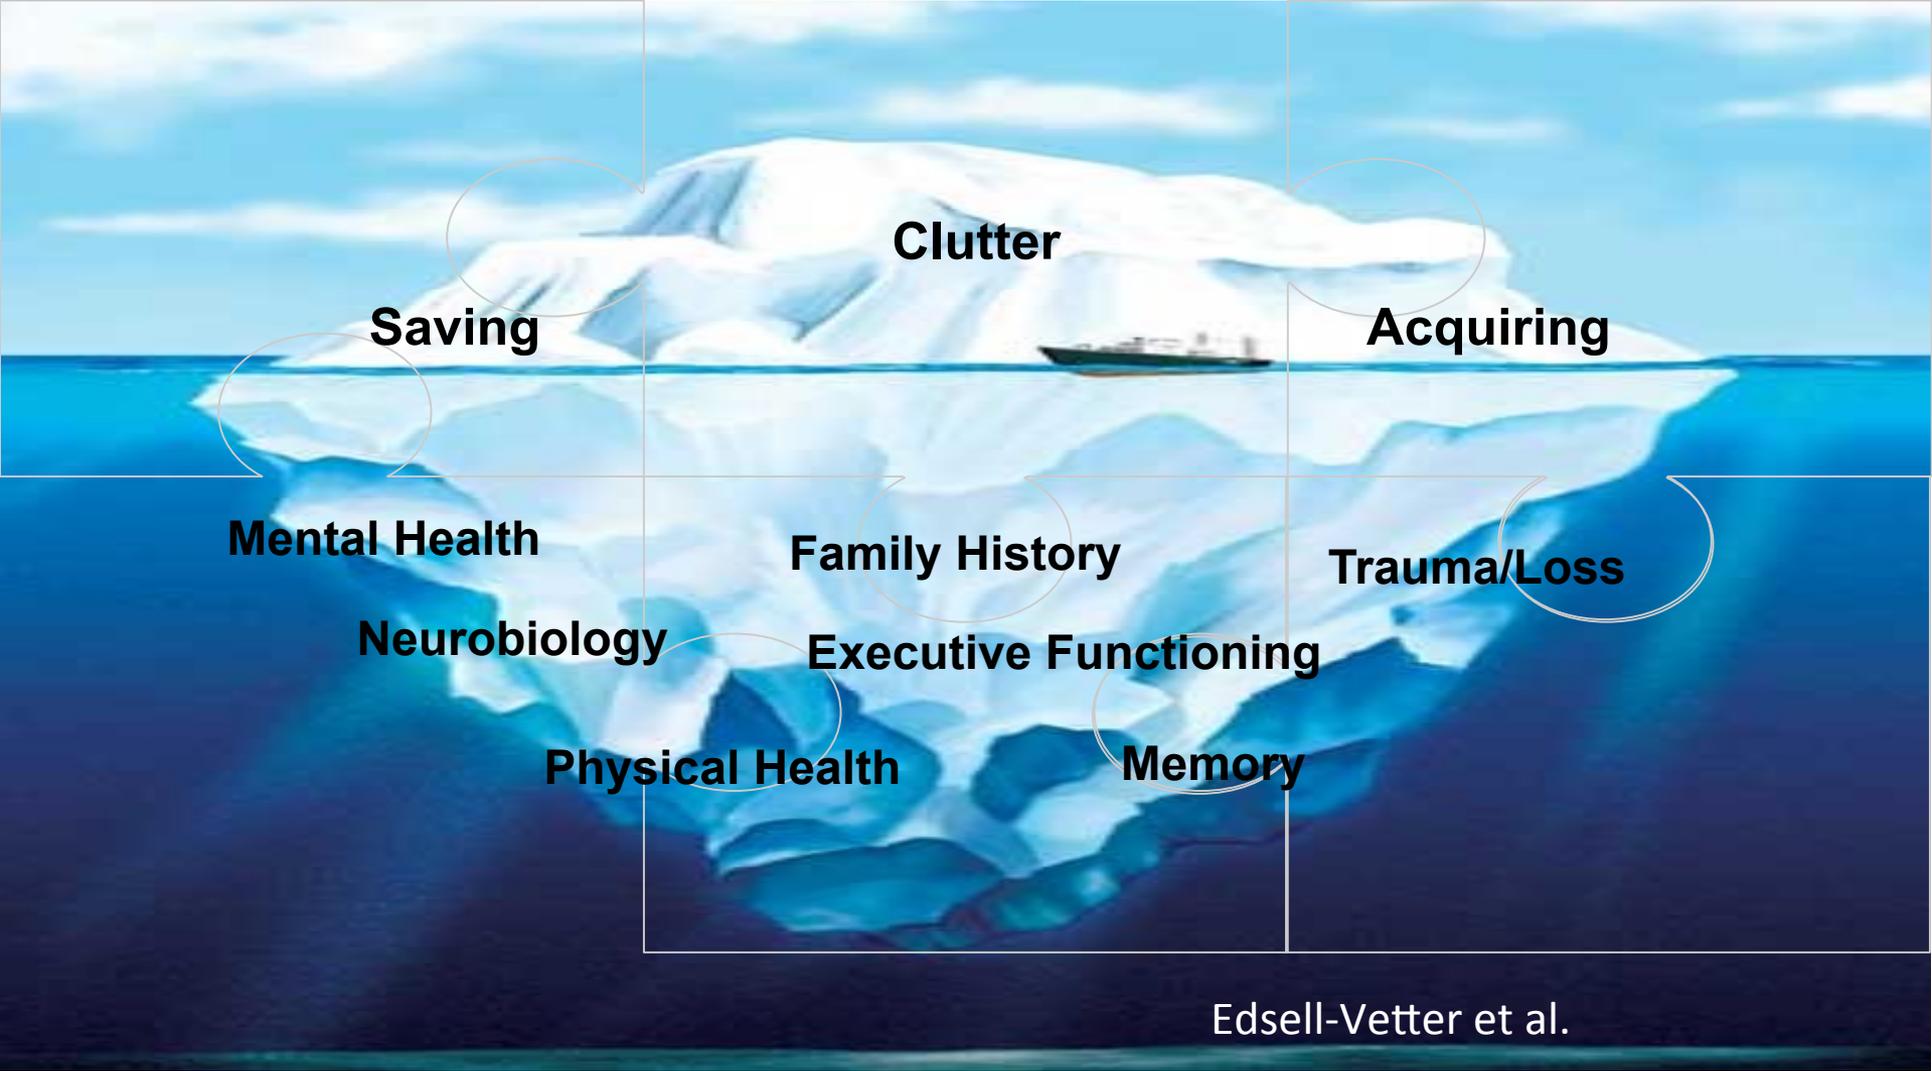

- Characterize the prevalence of hoarding behavior in BHA housing
- Assess the associations between clutter and/or poor sanitation, and pest control visits

Phase II:

- Pilot an intervention with residents to reduce hoarding behavior
- Develop and deliver a hoarding intervention training to key BHA staff

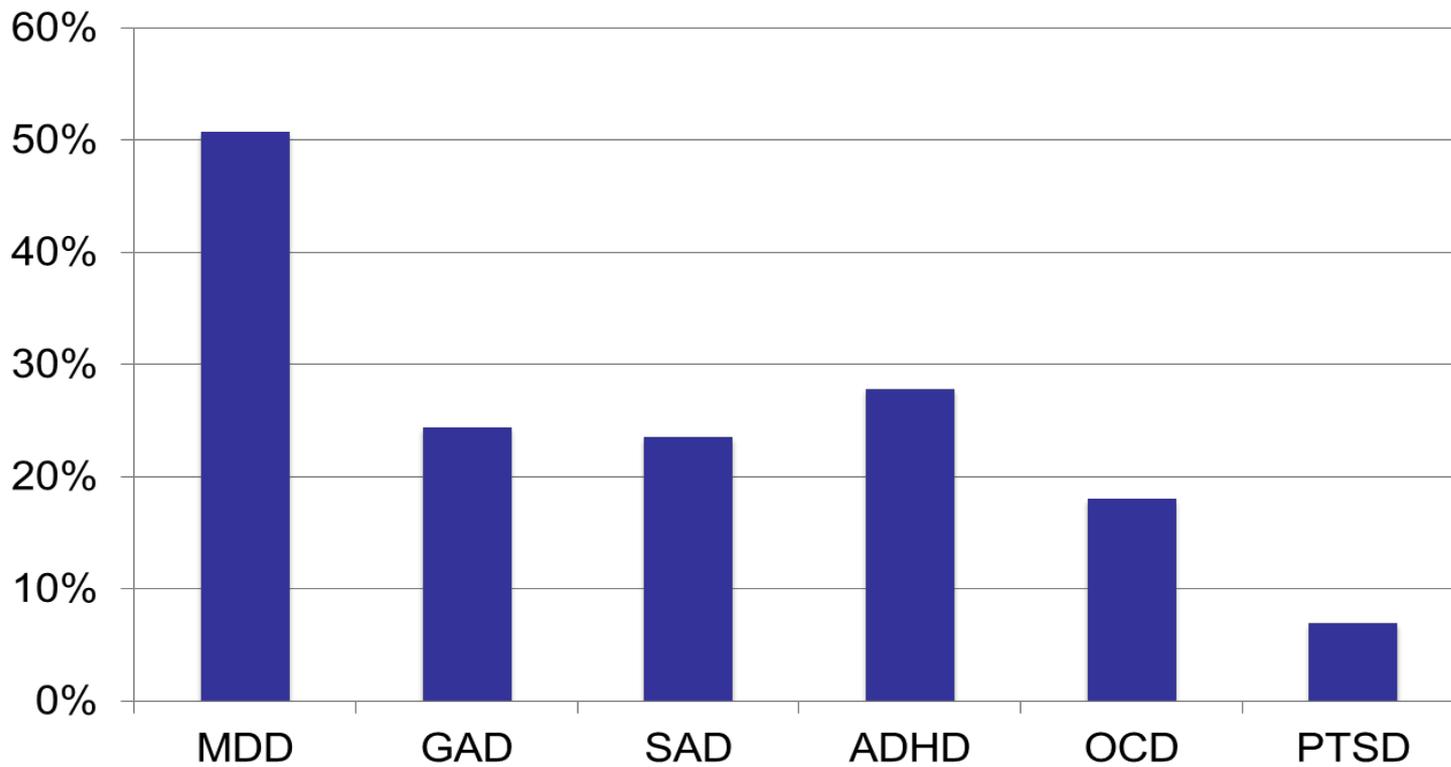

Hands on Strategies

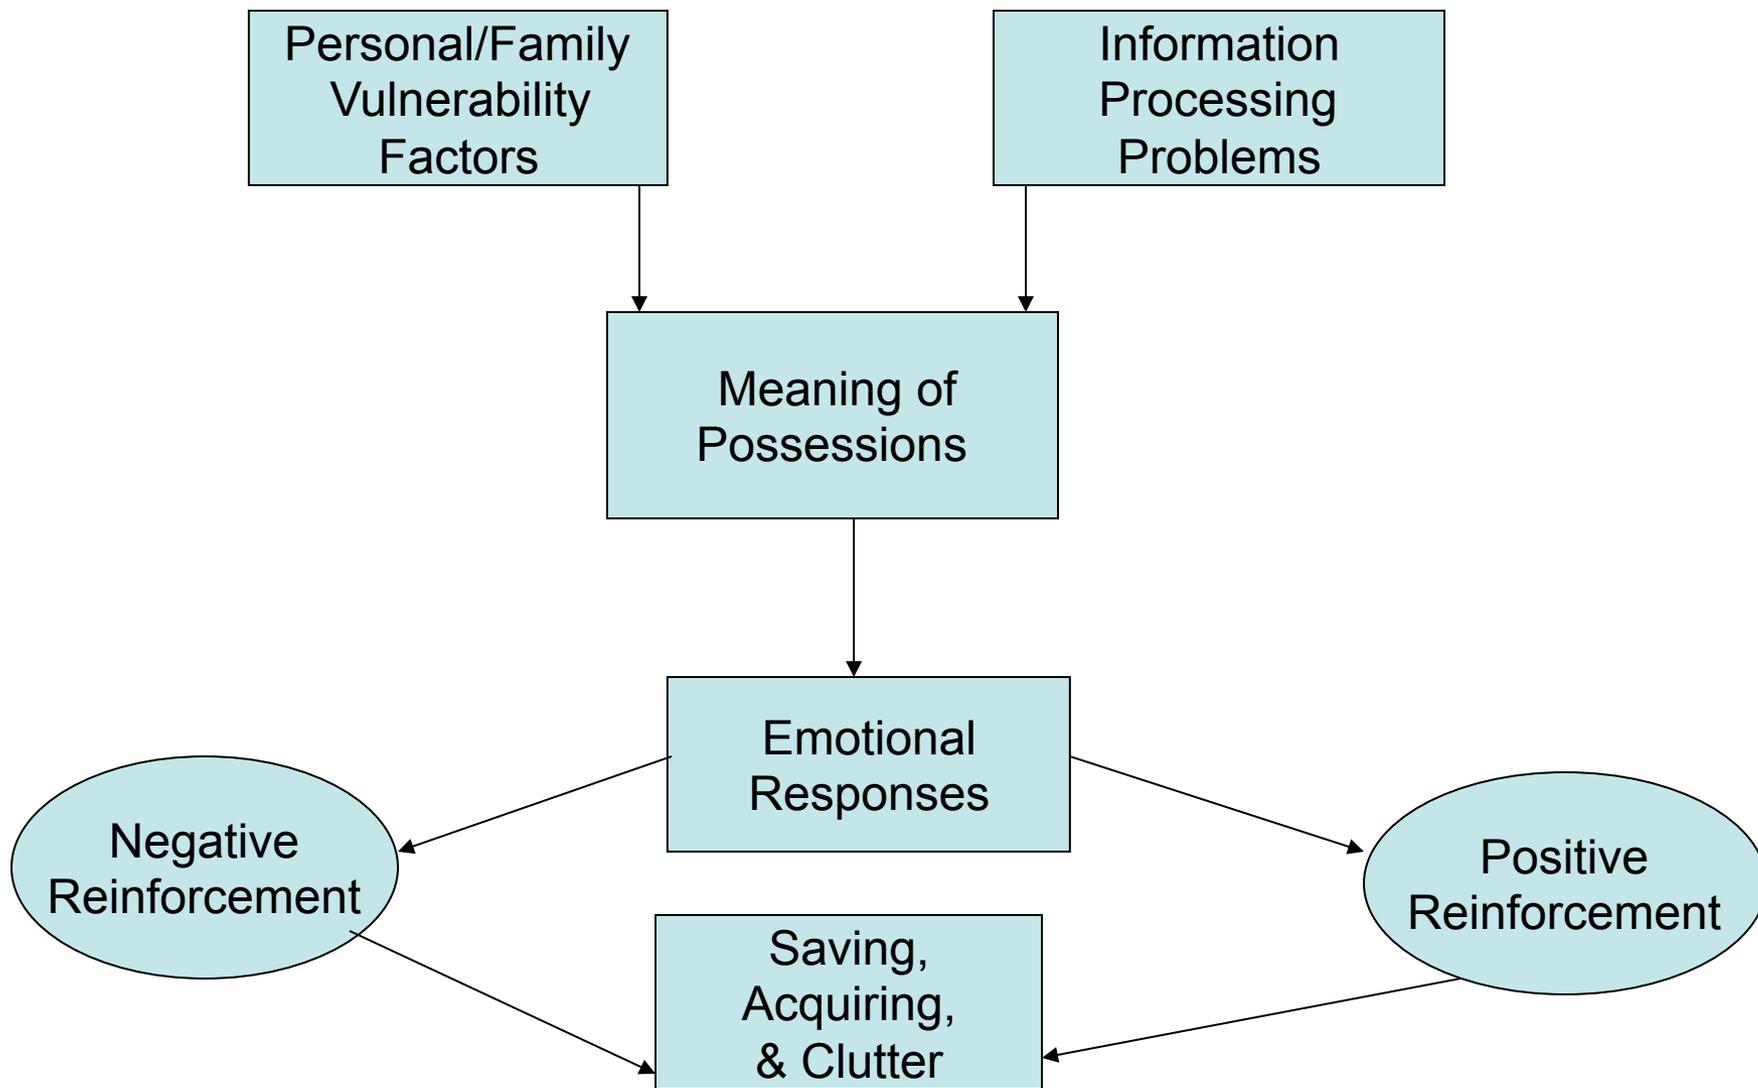

- Examine hoarding as a mental health problem that has health and safety consequences
- Understand how harm reduction is applied to hoarding
- Practice using hoarding specific assessments
- Identify partners and resources necessary for an effective intervention

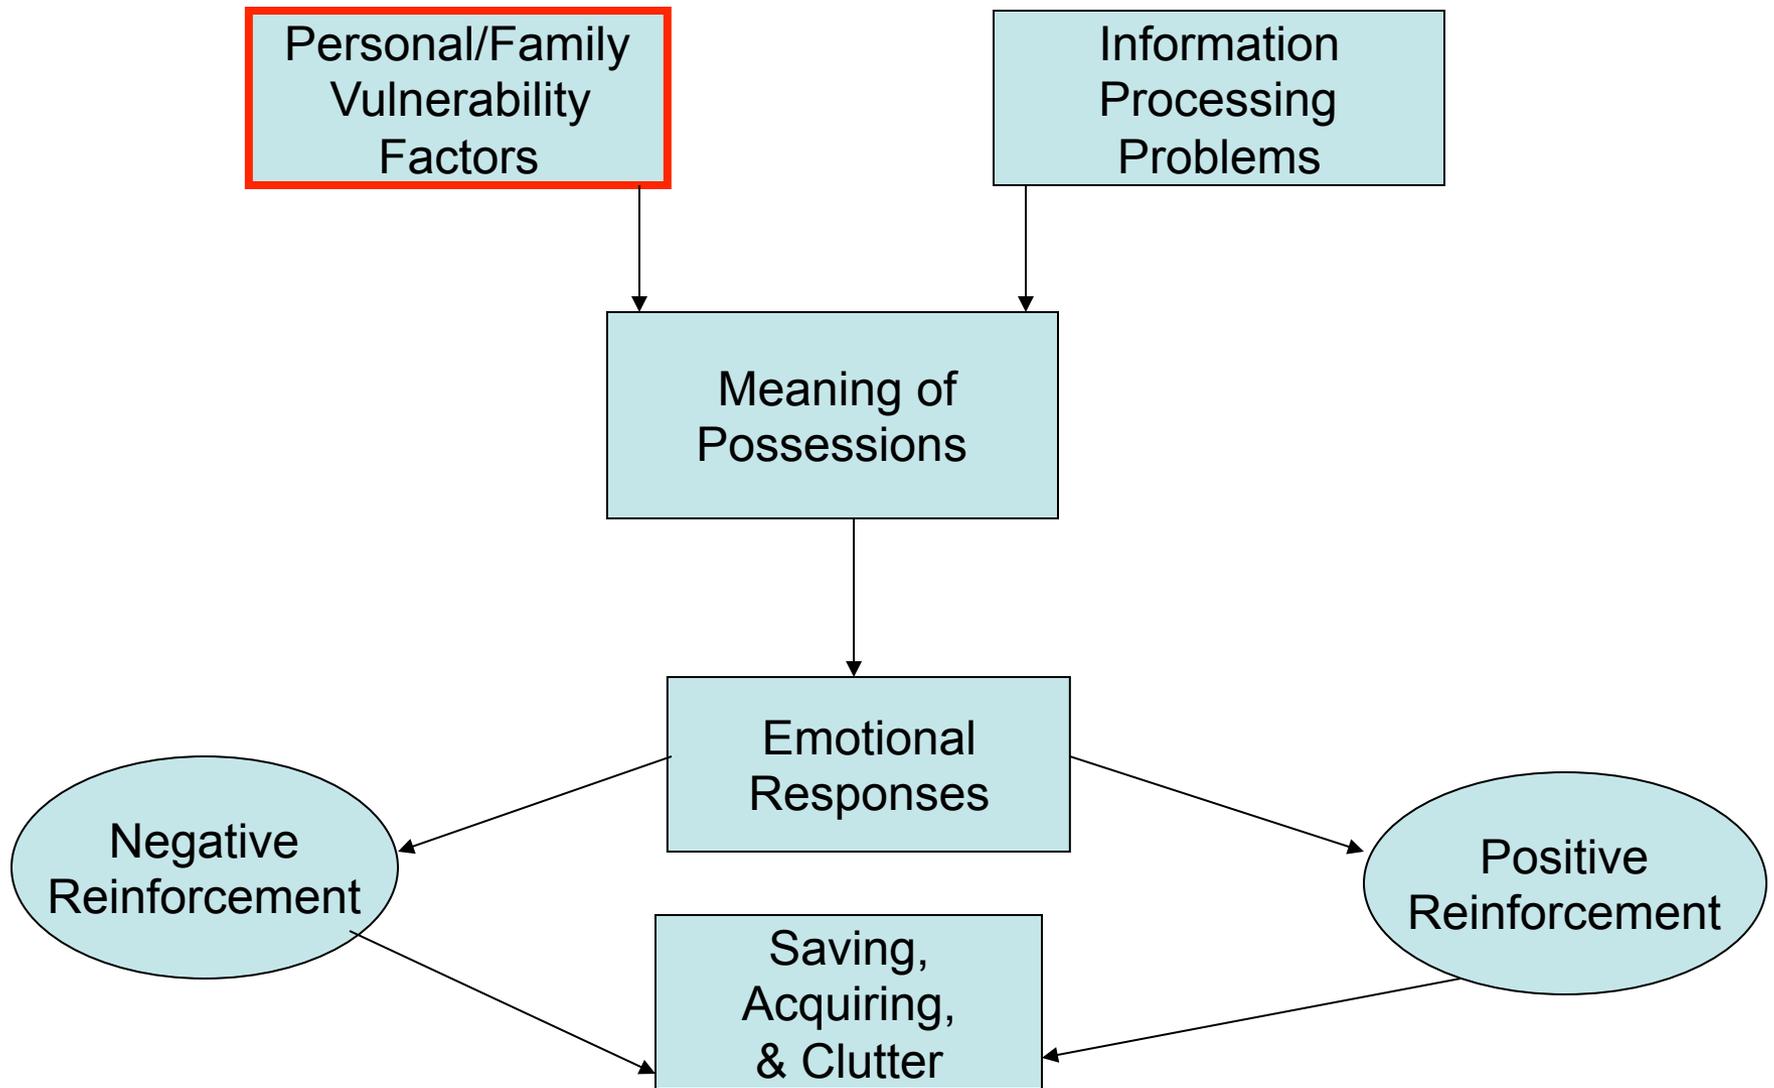

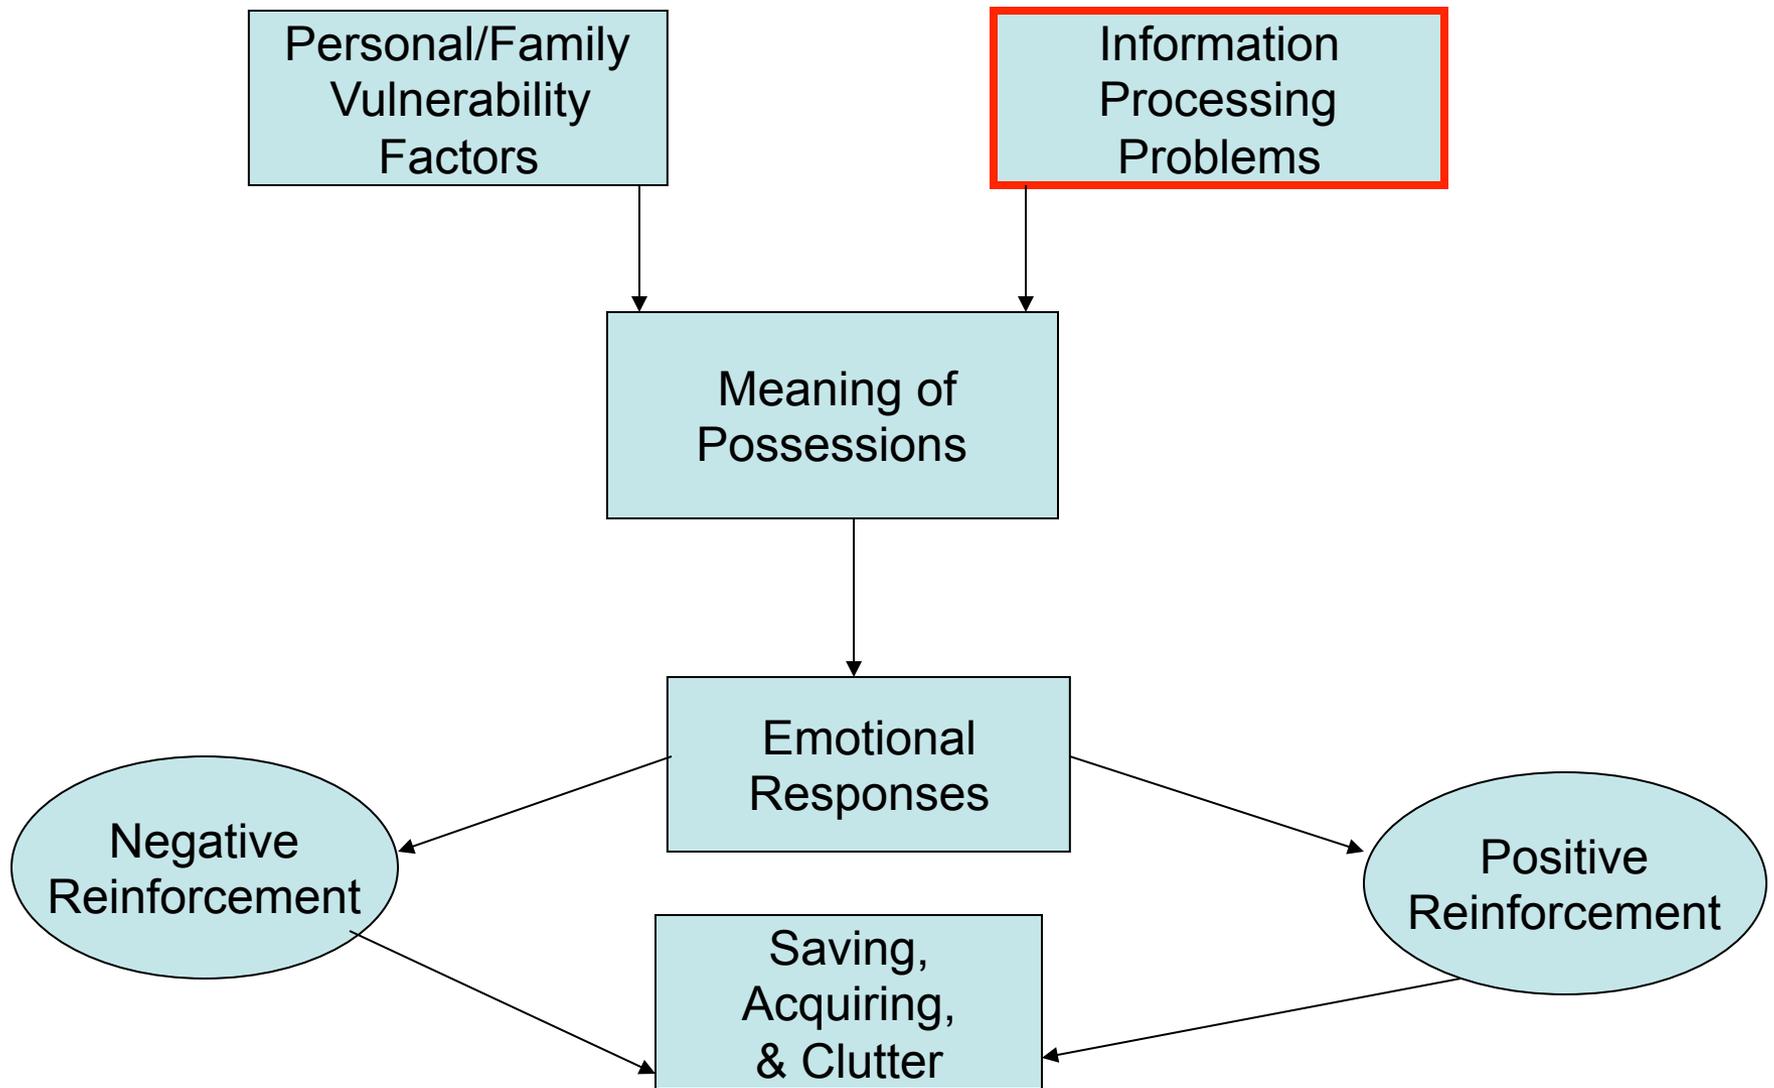

Most have other Mental Health problems

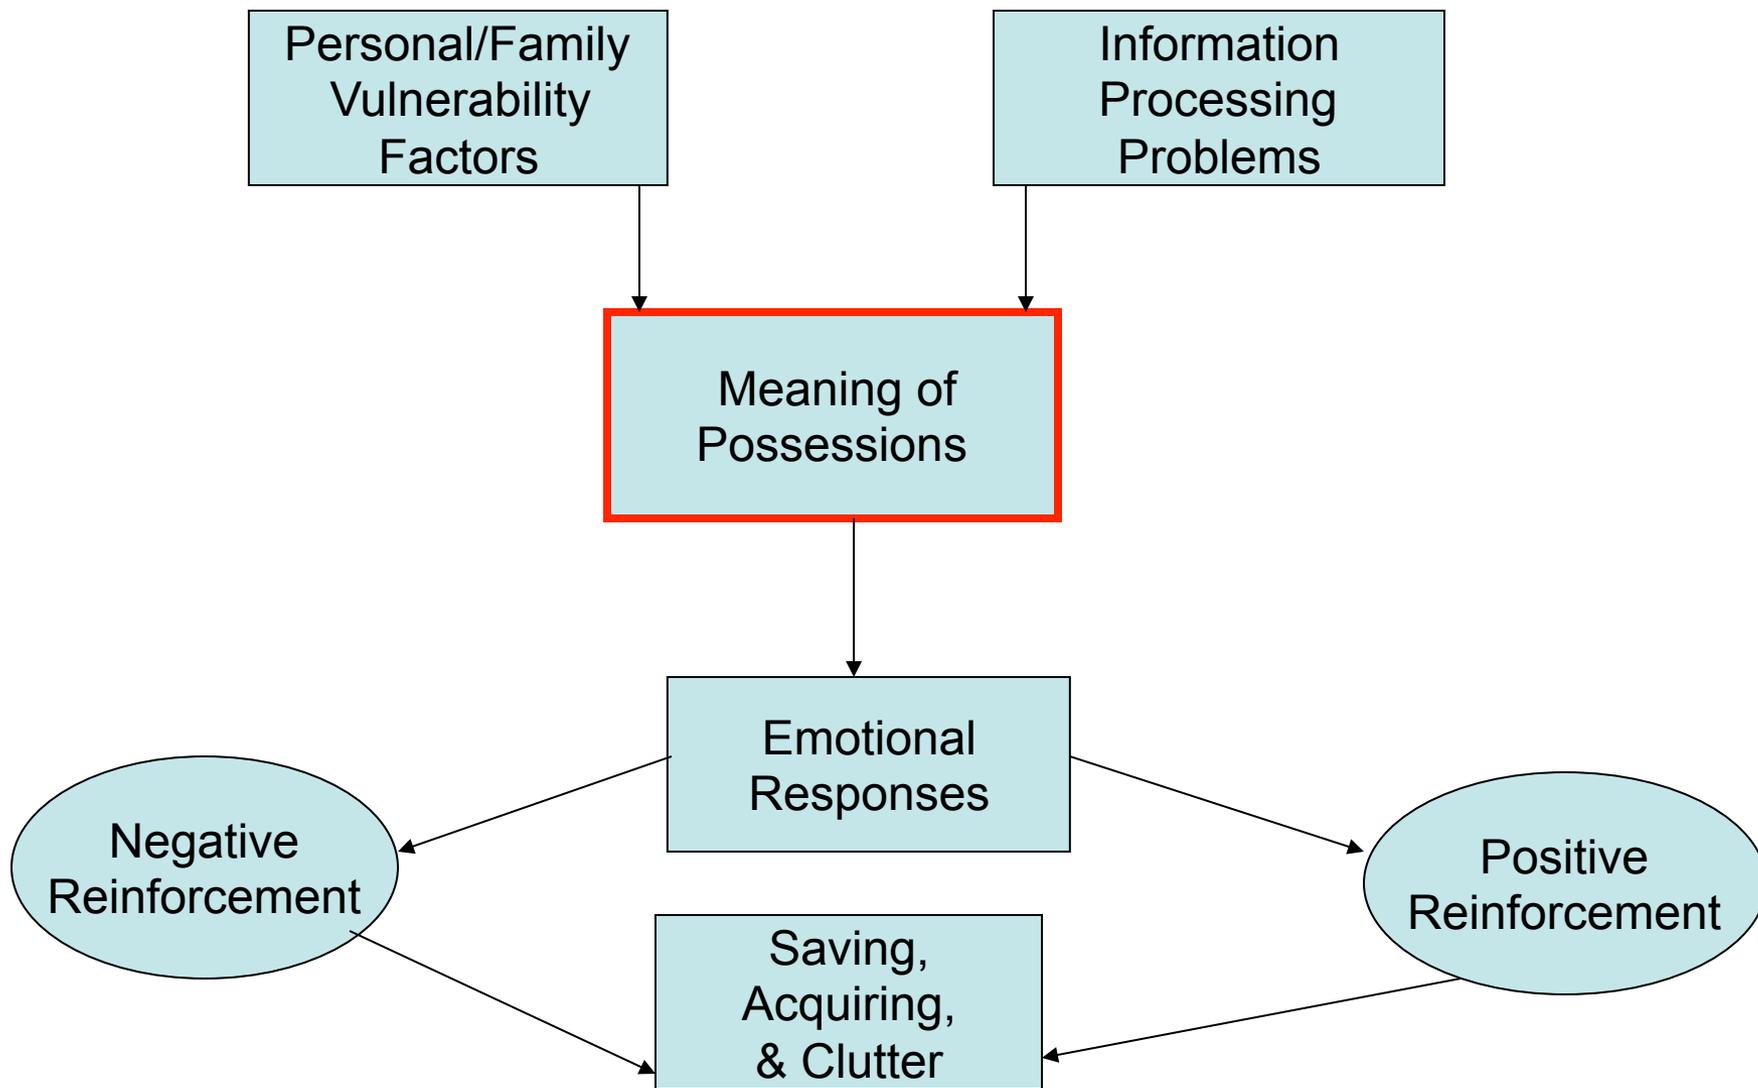

n=217 with hoarding disorder
(Frost, Steketee, Tolin et al., 2011)

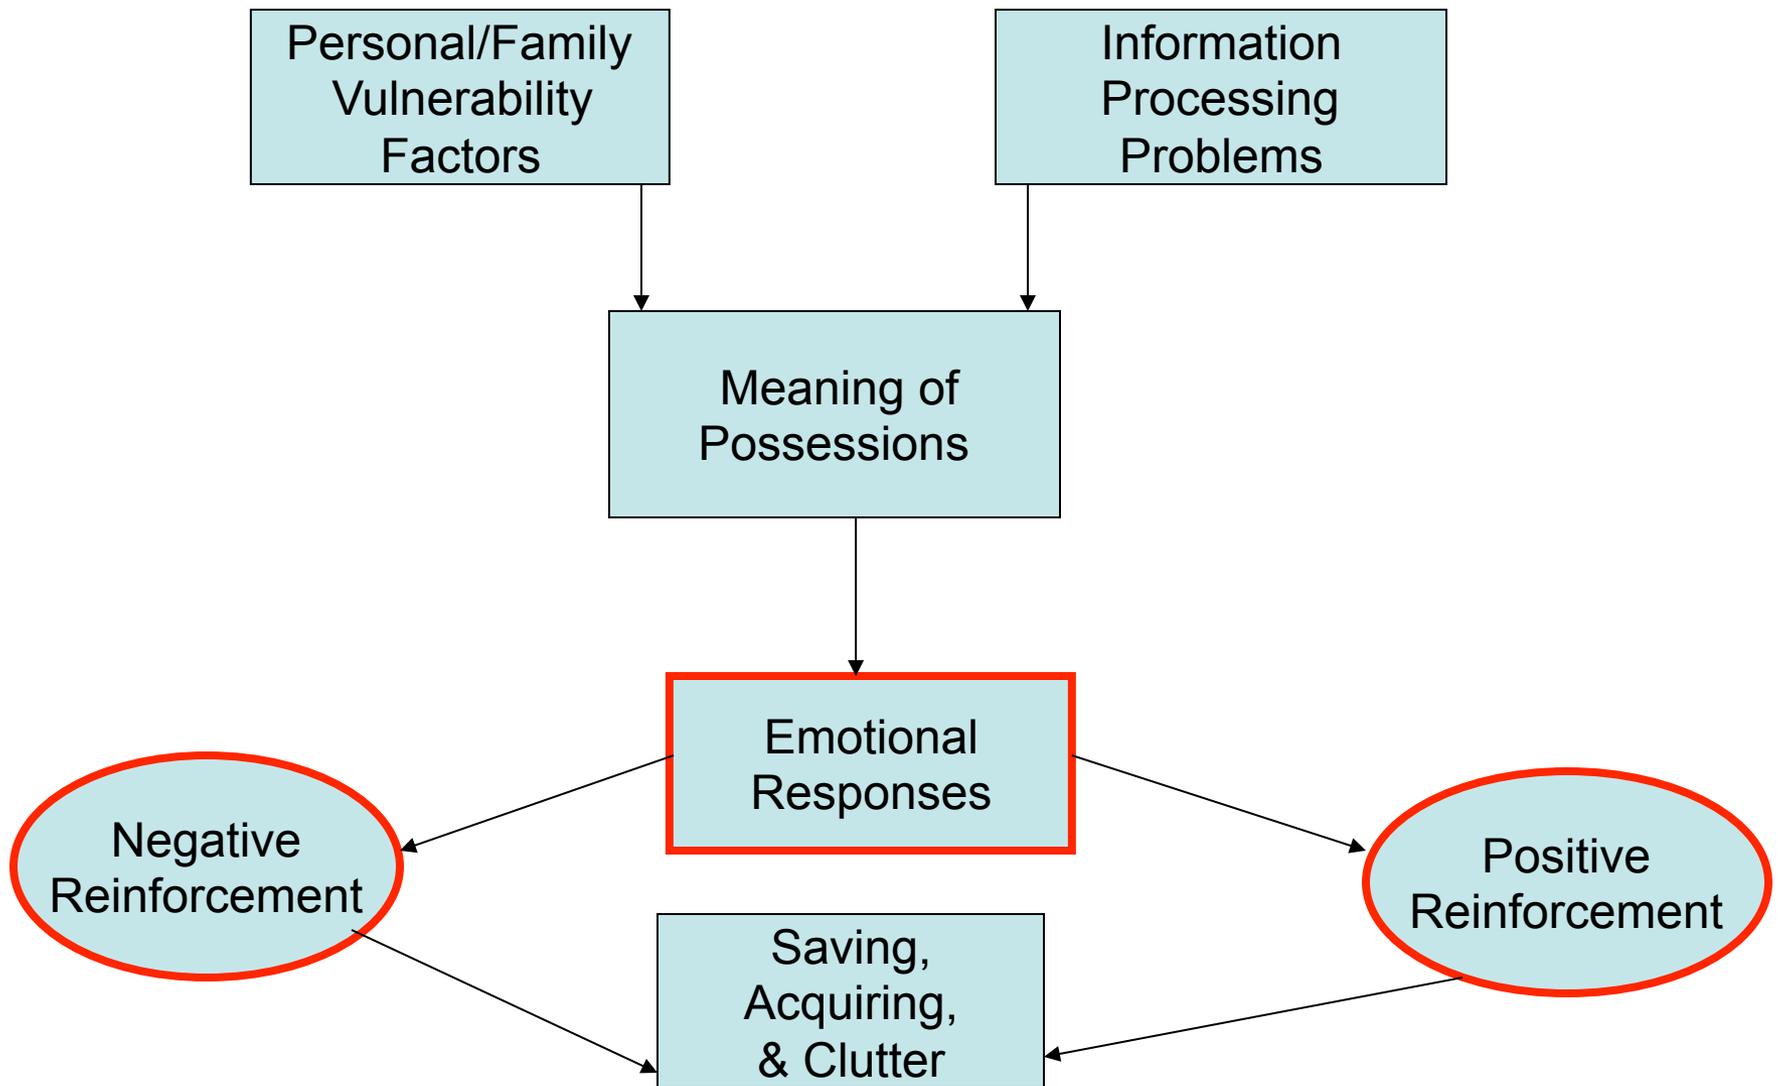

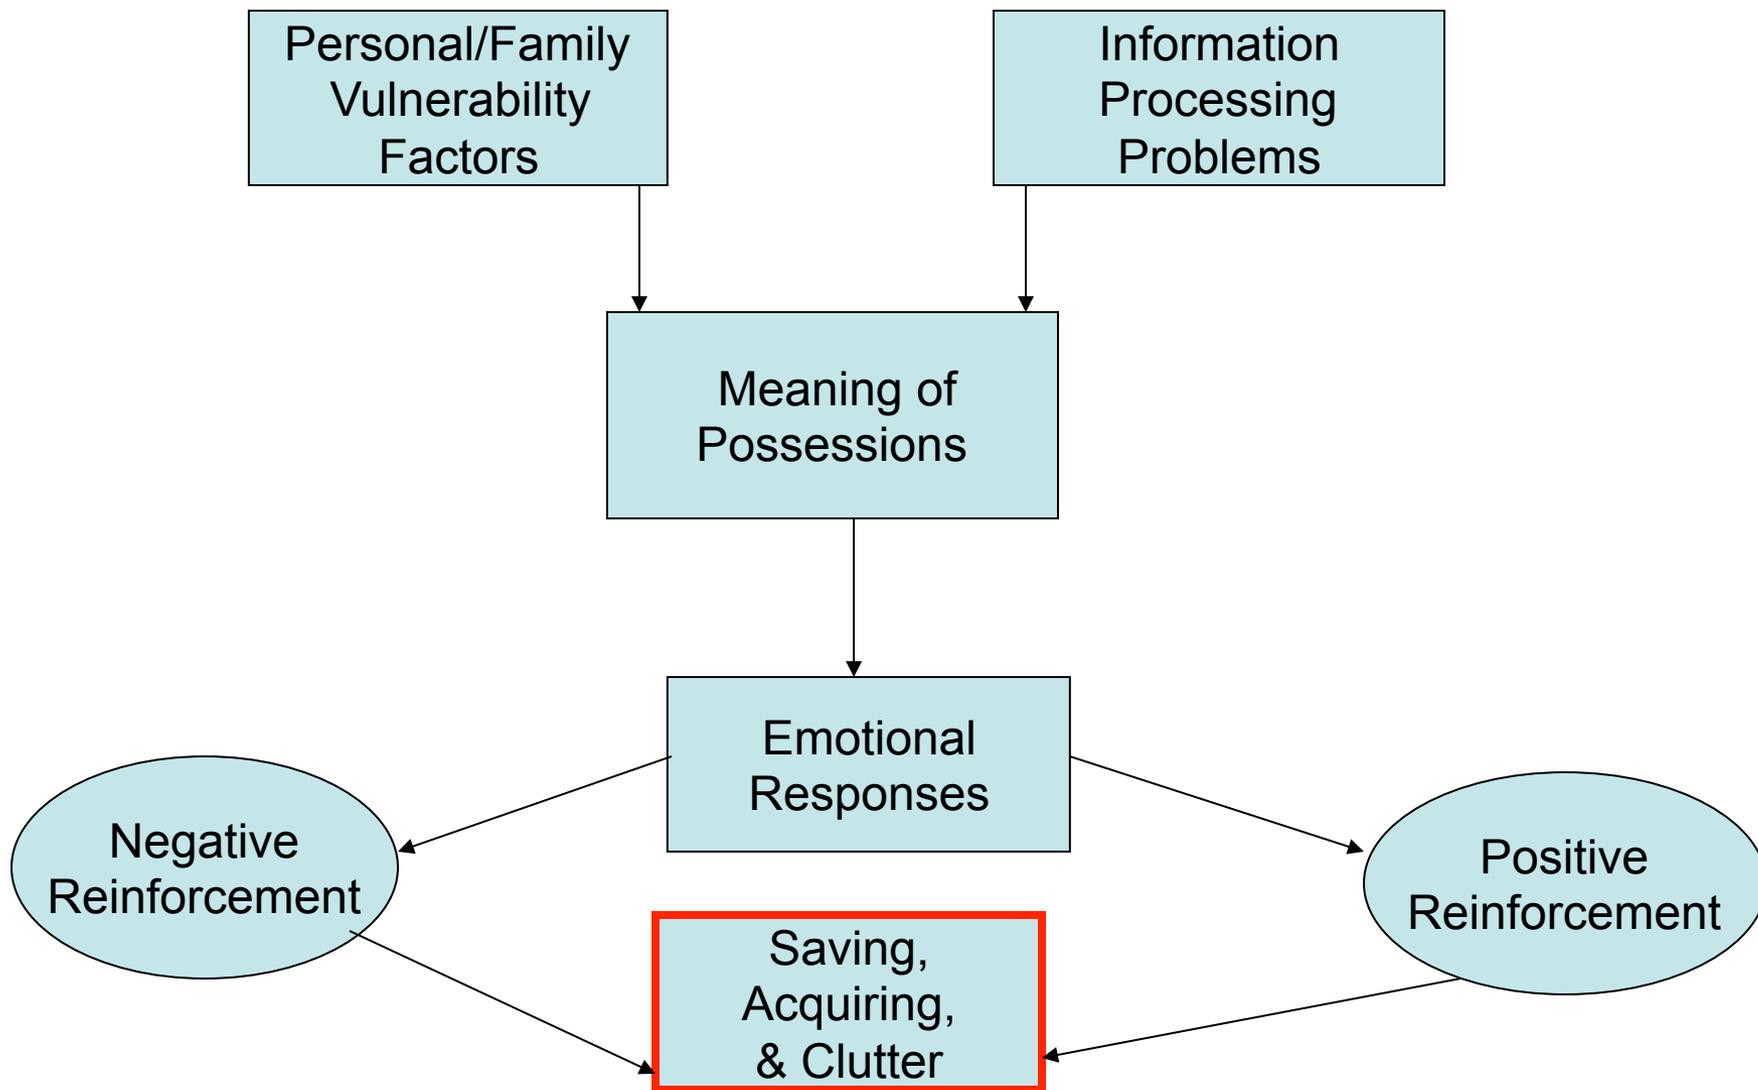

Motivation and Hoarding

What makes people motivated to change?

- Importance
- Confidence

Motivation enhancers

- Support
- Home visitors
- Connection to what's important/values
- Addressing co-occurring mental illness

Physical Manifestations

Saving: Papers, photographs, church bulletins

Acquiring: mail, church, newspaper articles

Clutter/Disorganization: large stacks of paper, boxes and bins of various objects

Assessment

Hoarding Assessments

- Clutter Image Rating (CIR)
- HOMES Multi-disciplinary Risk Assessment

Clutter Image Rating: Living Room

HOMES Multi-disciplinary Risk Assessment

Bratiotis, 2009

Instructions for Use

HOMES Multi-disciplinary Hoarding Risk Assessment provides a structural measure through which the level of risk in a hoarded environment can be conceptualized.

It is intended as an *initial* and *brief* assessment to aid in determining the nature and parameters of the hoarding problem and organizing a plan from which further action may be taken-- including immediate intervention, additional assessment or referral.

HOMES can be used in a variety of ways, depending on needs and resources. It is recommended that a visual scan of the environment in combination with a conversation with the person(s) in the home be used to determine the effect of clutter/hoarding on **Health**, **Obstacles**, **Mental Health**, **Endangerment** and **Structure** in the setting.

The Family Composition, Imminent Risk, Capacity, Notes and Post-Assessment sections are intended for additional information about the hoarded environment, the occupants and their capacity/strength to address the problem.

Common Code Violations

- Blocked egress
- Fire load (volume of items is too great)
- Fire hazards (items in oven, near heat source, etc.)
- Trip hazards
- Crush hazards
- Infestation
- Plumbing not functioning
- Sanitation concerns (rotting food, feces, etc.)
- Structural safety (weight of items)

ACES

Key communication phrases

Action Words:

Tell me about....

Show me....

Curious Questioning:

I wonder if...

Help me understand....

Empathetic Statements:

It sounds like you are feeling (worried about, feeling, etc.)...

I can understand (how hard this is, that you are feeling sad, etc.)

Statements of Concern:

I worry that....

I am concerned because...

Harm Reduction

Harm Reduction

- Keep people safe in their homes
- Focus on the reduction of possessions in high risk areas
- Set up systems to minimize acquisition and maintain organization
- Provide supportive monitoring for safety maintenance
- Do not expect overnight miracles
- Goal is house functional not house beautiful

(Tompkins & Hartl, 2009)

Harm Reduction – Tricks and Tips

Challenge

- Difficulty maintaining 36" egress
- Piles higher than 3-4 feet
- Items on or near stovetop

Strategy

- Use painter's tape to designate a path to windows and other rooms
- Use string or painters tape to provide a visual cue for acceptable pile height
- Use tape or a vase of flowers to keep areas adjacent to stove clear

Options for Intervention

Intervention Options

- Supportive, step-by-step reduction of clutter
 - Case management or behavioral coach (in home)
 - Mental health treatment (specialized CBT for hoarding)
 - Utilize harm reduction strategies
- Supported clean-out
- Clean out without control/presence
- Eviction/Condemnation

Factors To Consider In Intervention

When determining which intervention option to choose, consider:

- Level of risk to the resident and others
- Physical or mental health disabilities
- Support services in the home and community
- Willingness of the resident to engage with support services
- Potential capacity issues (referral to Elder Services, etc.)

Sorting in 3 Piles

- Piles: **Keep** * **Discard** * **I Don't Know**
- All items in **Keep** pile need to have a final location at the end of the sorting session
- **Discard** pile can mean: recycle, sell, give away, donate, garbage, etc.
- **I Don't Know** pile is intended as temporary during sorting process to keep things moving quickly; a decision about all items in this pile must be made before the end of the sorting session

Steps in a Decluttering Session

- Select target area & type of possession
- Create categories for this type of possession
- Continue excavation until target area clear
- Plan appropriate use of cleared area
- Plan for preventing new clutter to area

Using a Team Approach to Hoarding Intervention

Using an in-home coach

(family member, friend, home health aide, student, hired assistant)

- Provide emotional support and encouragement
- Helps identify areas to work
- Help the client stay focused on tasks
- Guide decisions, but don't make them
- Be a cheerleader
- Help with hauling
- Accompany the person on non-acquiring trips
- Celebrates successes (however small)

Boundaries of a Coach

- Opinions & Judgments
 - Non judgmental
 - Objective
- Touch or no touch
 - No touching possessions to begin
 - Goal is to allow touching to provide maximum assistance

Keys To A Team Based Approach

- **Use carrot/stick approach**
 - If your professional identity is one of enforcement, it is helpful to pair with a supportive professional
- **Use coordinated service plan**
 - Clearly outlines roles/responsibilities of all agencies and resident
 - Useful for clear communication and holding all accountable
 - Outlines limitations and contingency plans
- **Establish who on the team determines when the unit meets compliance and someone who coordinates communication/services**

Elements of an Effective Plan (e.g., Forced Intervention, Reasonable Accommodation)

- Specify infractions: Set Specific standards in specific areas
- Determine measurable objectives, timeline for each step, and deadline
- Identify resources for assistance (e.g., trash removal? Who will pay?)
- Determine (& monitor) achieved objectives (e.g., Who? How often?)
- Clarify consequences of non-compliance
- Create common goals with client
- Utilize carrot/stick strategy
- Support and monitoring after plan/ compliance is achieved?
- Clean-out, eviction, condemnation as last option

Community Task Forces

- Urban and rural
- Over 85 known in US
- Public cases of hoarding
- Outgrowth of community tragedy, professional passion, media/political pressure
- Voluntary with public and private sector members
- Education and/or coordinated assistance

Bratiotis (2013)
Health and Social Care in the Community,
21(2), 245-53

Hoarding Task Force Membership

- Protective Service
- Public health
- Mental health
- First responders
- Housing
- Animal Control
- Pest management
- Nursing
- Sanitation
- Code enforcement
- Aging
- Legal
- Occupational therapy
- Professional organizers
